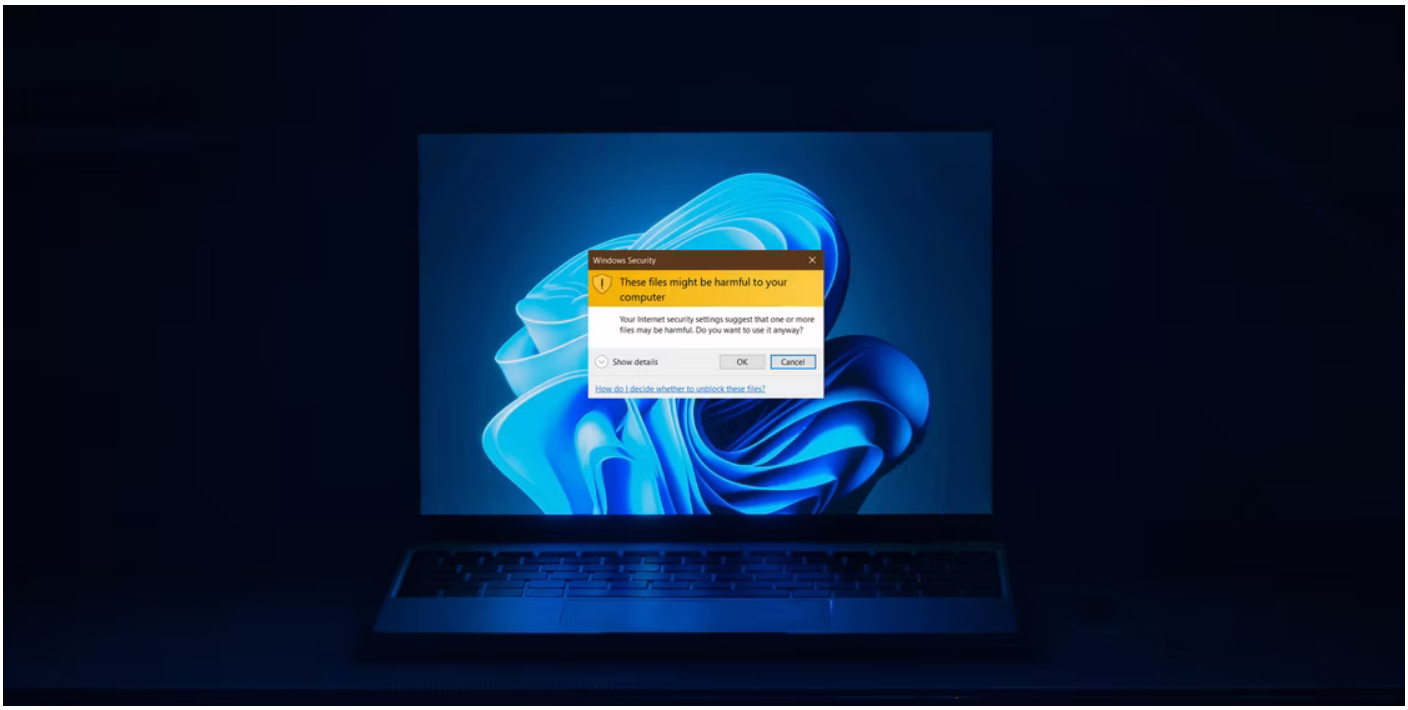
Disable These Files Might be Harmful for your Computer Warning

Windows

On windows if you connect to the network drive, and tries to right click files, you might get these nasty warnings every single time you right click the file.



To solve this issue you would need to trust the IP address of the network drive on your computer.

1. Open up **control panel**
2. Click on **Network and Internet**
3. Click on **Internet Options** and click on **Security** tab
4. Then click on **Local intranet** and click on **Sites**
5. Click on **Advanced** and finally enter in the IP address of the network drive

Wa-la you should no longer seeing these errors after right clicking the files.
